This release of radio firmware supports ALL models/bands of the Professional Series Mobile Radios. For any questions, please contact Customer Resources at 1-800-927-2744.

I. Enhancements

None

II. Firmware Corrections

Item #1: **On/Off button sometimes cannot turn on or off the radio.**

When the CDM mobiles radio is set with option On/Off & Ignition, and the radio is powered on. If the IGN key is at on position, the radio does not always turn off or on with the radio's On/Off button. To temporary clear the problem, both the main power cable and ignition sense cable have to be disconnected from the radio, then they should be reconnected back in to get the radio On/Off functioned as it should be.

This firmware has fixed this problem.

III. Known Issues

None
